EDUCATION

NEW YORK UNIVERSITY — May 2024
Bachelor in Computer Science and Data Science

UNIVERSITY AT BUFFALO, THE STATE UNIVERSITY OF NEW YORK — Fall 2017 - Spring 2019
Bachelor of Science in Business Administration
Marketing Concentration

TECHNICAL SKILLS

- **Data Analytics Tools**: Python (PyTorch, TensorFlow, Keras), R, SQL, Hadoop, MongoDB, Postgres, HQL(Hive)
- **Data Visualization**: Tableau, Dbeaver
- **Programming Languages**: Java, Javascript, TypeScript, Dart, C
- **Other Tools**: MS Office, Putty, Fiddler, Flutter

EXPERIENCE

Epopcon (Tech startup providing a data management platform) — Seoul, Republic of Korea
Data Analyst — May 2023 – Aug 2023

- Improved data acquisition for 1,000,000+ products across companies such as CJ, LG, and GFK boosting data accuracy and expediting collection processes, to provide timely and accurate insights into sales performance and other data-driven approaches.
- Led the development of training manuals and code guides, increasing onboarding efficiency by 30% and enabling internal programmers to focus on advanced projects by delegating repetitive tasks to outsourcing vendors.
- Facilitated a transition from Java to TypeScript, enhancing code maintainability and development efficiency.

The Satellite Brewing Co (Craft beer startup in newly growing CB market) — Seoul, Republic of Korea
Business Strategy Team Staff — Nov 2021 – Dec 2021

- Employed clustering algorithms and sentiment analysis of customer feedback to segment satisfaction data by beer type, guiding specific product refinements and precision marketing initiatives.
- Enhanced cross-departmental synergy between factory and office teams by establishing communication protocols and manuals, resolving production conflicts, and ensuring consistent product quality.
- Oversaw quality control and streamlined packaging for a flagship collaboration with Samyang Food (Buldak), coordinating design, production, and distribution to elevate the marketing event's success.

Republic of Korea Army Maneuver Task Force — Jeungpyeong, Republic of Korea
Special Communication Officer / Quick Reaction Force leader — Dec 2019 – Jul 2021

- Led the 1st company of 24 units, positioning the company as the leading unit within the entire battalion.
- Held over 30 individual meetings monthly as battalion consultant to preempt potential internal disputes and enhance battalion morale.
- Directed a team of 24 as part of the Presidential security unit, chosen for its elite status in the Republic of Korea Army.

L.E.K. Consulting — Seoul, Republic of Korea
Research Assistant — May 2019 – Jul 2019

- Initiated in-depth research and data analysis for a pivotal M&A project in Korea's emerging cardboard sector, leveraging Python for data cleansing and visualization to uncover critical industry trends, competitor strategies, and market dynamics.
- Identified value-up opportunities and predicted expected CAGR by analyzing raw material price trends and operating costs, optimizing data collection and forecasting to evaluate M&A feasibility.
- Coordinated interviews with industry experts from Japan and the USA to gather insights, enhancing strategic decision-making and improving M&A feasibility evaluations.

Denave — Seoul, Republic of Korea
Software Asset Manager @ Microsoft Korea — May 2018 – Aug 2018

- Automated data scraping processes using Selenium to optimize the database creation of dormant clients, achieving a 40x efficiency increase compared to previous methods.
- Reactivated dormant clients and reestablished effective communication channels, enhancing Microsoft Korea's client engagement and retention strategies.

Projects

Fashion Recommendation System

- Technologies: Python, TensorFlow, OpenCV, Pandas, NumPy, ResNet
- **Model Development**: Engineered a deep learning-based fashion recommendation system using a customized ResNet architecture with Inception module integration. Optimized the system for predicting and recommending clothing items to enhance user experience on digital fashion platforms.
- **Image Processing & Localization**: Applied advanced image preprocessing techniques, including resizing, normalization, and localization (bounding boxes), to improve the consistency and accuracy of model inputs, leading to more precise predictions.
- **Content-Based Personalized Recommendations**: Developed a content-based recommendation engine that leverages current product data to provide tailored clothing suggestions based on user preferences, improving overall user engagement and satisfaction.
- **Personalized Recommendations**: Delivered a scalable solution that improved user satisfaction by personalizing fashion recommendations based on individual preferences and real-time data.

Keyword Extraction System (Natural Language Processing)

- Technologies: Python, PyTorch, Hugging Face Transformers, sklearn, tqdm
- **Algorithm Implementation**: Developed keyword extraction algorithms using TF-IDF, PageRank, and KeyBERT (BERT-based) for enhanced natural language processing.
- **Performance Evaluation**: Evaluated performance with precision, recall, F1-score, Normalized Discounted Cumulative Gain (NDCG), and Mean Reciprocal Rank (MRR) metrics.

NYC Vehicle Collision and Car Brand Safety Analysis

- Technologies: Python, Selenium, Pandas, Apache Hadoop, MapReduce, HIVE, Tableau
- **Data Extraction and Management**: Automated scraping of car safety ratings from the NHTSA website using Python and Selenium; managed data in Pandas DataFrames.
- **Data Processing and Analysis**: Cleaned and processed datasets using Hadoop MapReduce; imported data into HIVE for efficient querying and analysis.
- **Collision and Safety Insights**: Analyzed relationships between collision points of impact and injury rates using HIVE queries; performed registration trend analysis.
- **Visualization and Reporting**: Created visualizations with Tableau to present findings, highlighting Volvo's top safety performance and providing insights into vehicle safety and market trends.

Scholarship

University at Buffalo International Admission Scholarships
Awarded to talented international freshman ($40,000 / 4 years)
